Character Design & Visual Development

From initial sketches to finished character illustrations and 3D presentation.

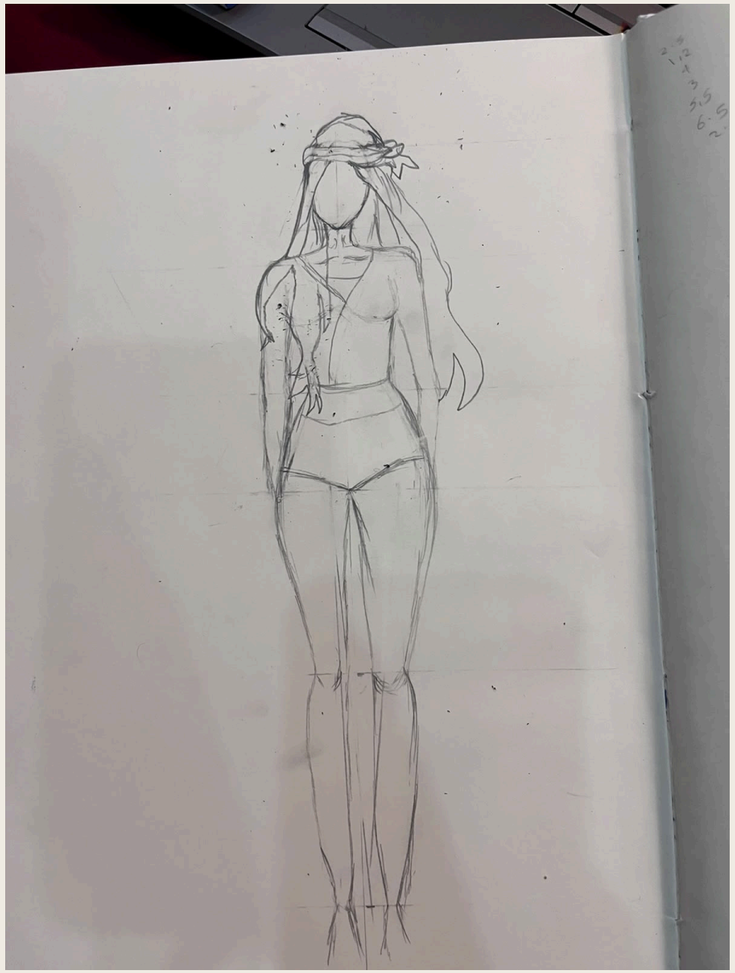

Sahra Secrets

A character design and visual development case study: a desert adventurer, followed from a first pencil construction to a finished illustration, size variations and a final scene.

CHARACTER DESIGN | ILLUSTRATION | ADOBE ILLUSTRATOR | VISUAL STORYTELLING

A INITIAL CONCEPT

CONSTRUCTION SKETCH
Proportions and pose built with guidelines, pencil on paper.

DETAILED SKETCH
Costume, veil, headwrap and silhouette resolved.

B CHARACTER DEVELOPMENT

The finished character

The sketch becomes a clean vector illustration in Adobe Illustrator, with layered clothing, a belt and boots in a restrained teal, sand and brown palette.

REFERENCE

The detailed sketch it was developed from.

C CHARACTER VARIATIONS

Three presentations

The same costume at three scales: a small helmeted version, the veiled adventurer and a taller, unveiled version.

D FINAL SCENE

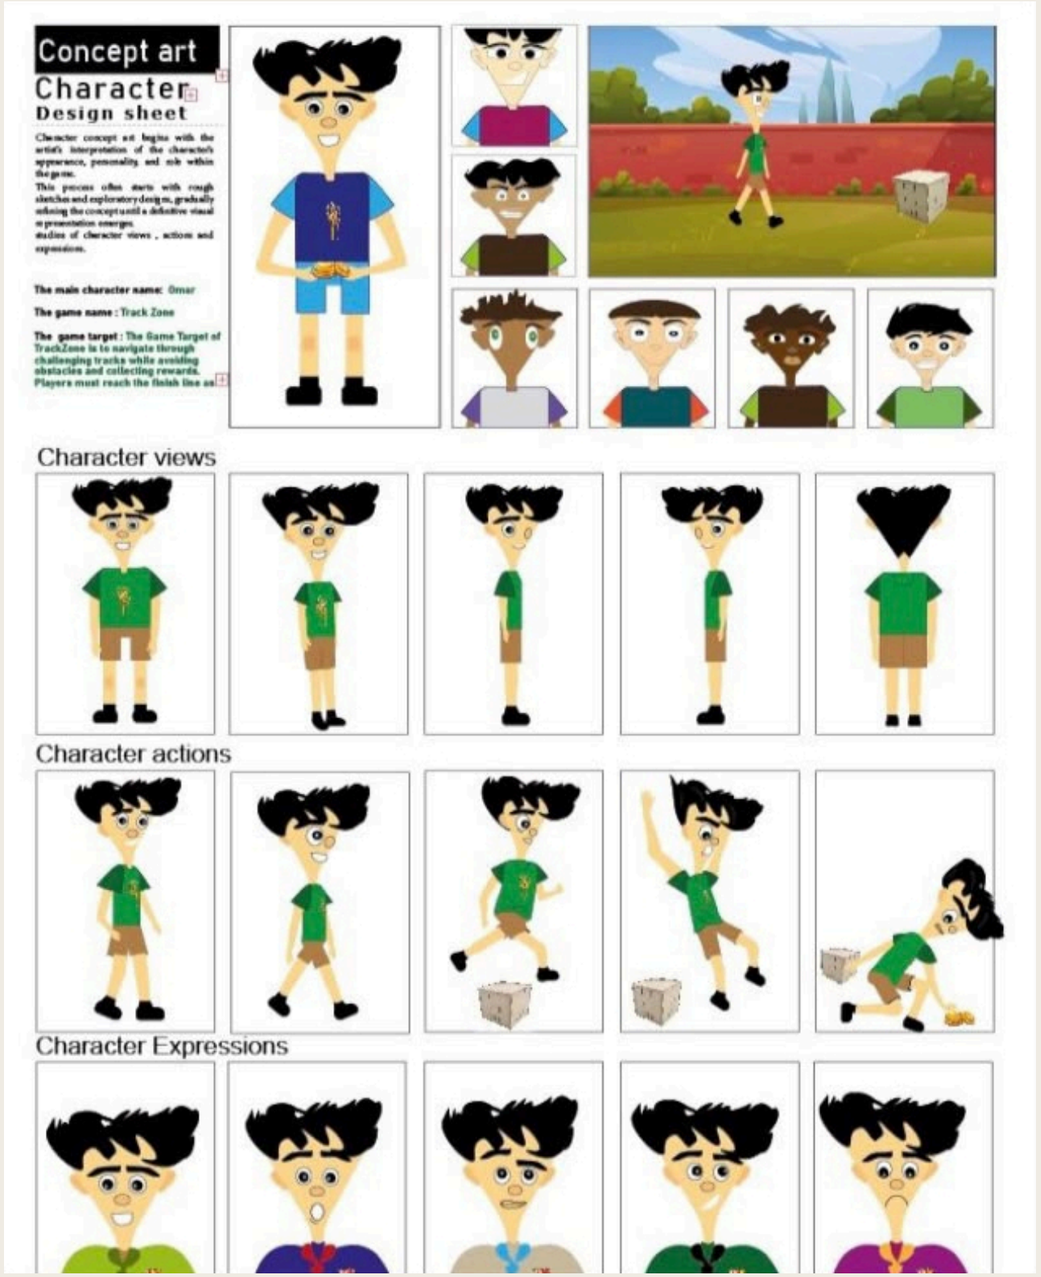

Into the desert

A camp, a treasure chest with a golden snake, a lion balloon, a genie lamp and a map. The character walks through the world built around her.

Track Zone

A character design sheet for the game Track Zone. The main character, Omar, is shown with a full-body design, alternative character heads, a game setting, views, actions and expressions. The game goal on the sheet: navigate challenging tracks, avoid obstacles and collect rewards.

CONCEPT ART | CHARACTER SHEET | ADOBE ILLUSTRATOR

CHARACTER SHEET

Views, actions and expressions keep the character consistent across poses.

Cosmic Challenge

A game concept with a title screen (Play, Options, Quit), a spiky-haired hero and an alien world. Next to it, the same hero as a figure.

> Left: 2D, drawn by Maryam in Adobe Illustrator. Right: an AI-generated 3D visualization of how the character might look if it came to life.

2D · DRAWN IN ADOBE ILLUSTRATOR

TITLE SCREEN
Hero inside its game world.

3D · AI-GENERATED VISUALIZATION

VOID PUPPETEER
Wireframe, figure and box.

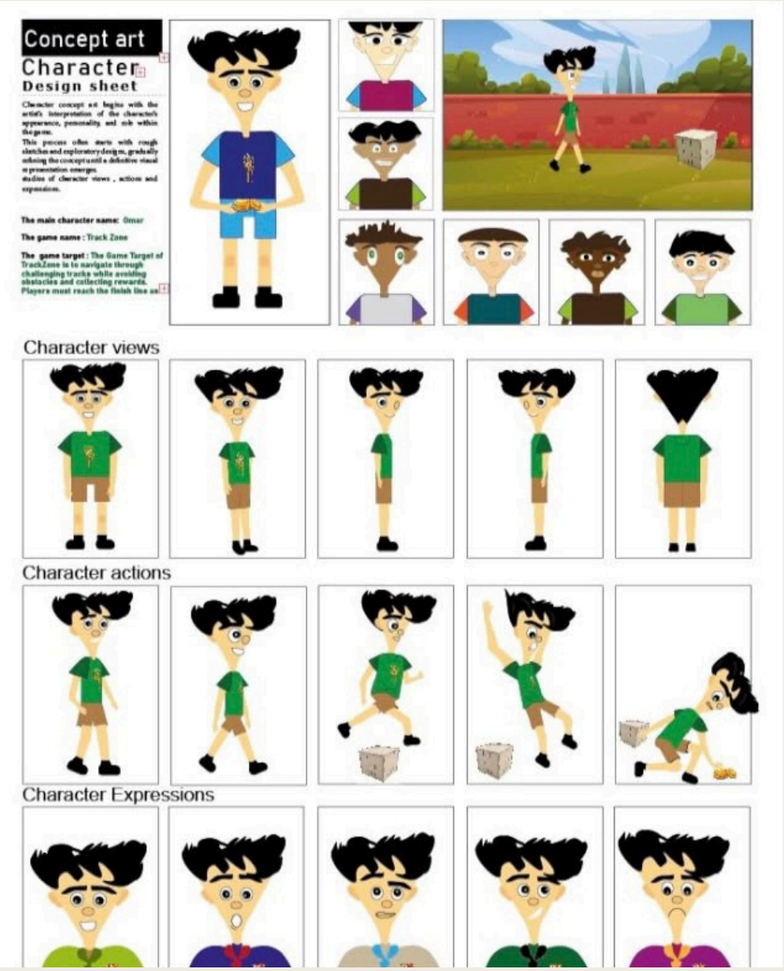

From sheet to figure

The Track Zone character design next to a 3D presentation of the same character: black spiky hair, green T-shirt with a camel print, brown shorts.

> The 2D design is drawn by Maryam in Adobe Illustrator. The 3D figure is an AI-generated visualization of how the character might look if it came to life.

Note for the developer, remove before publishing: the 3D box reads "Runaway Game", the sheet reads "Track Zone".

2D · DRAWN IN ILLUSTRATOR

CHARACTER DESIGN

Track Zone sheet.

3D · AI-GENERATED VISUALIZATION

IF IT CAME TO LIFE

Wireframe view and figure.

Echoes of Forgotten Paths

Another character imagined as a collectible figure, with a wireframe view and a boxed figure.

> AI-generated 3D visualization: how this character might look if it came to life. The 2D characters on this board are drawn by Maryam in Adobe Illustrator.

3D · AI-GENERATED VISUALIZATION

The whole collection

Many of the characters together, shown as boxed collectible figures in front of their wireframe models.

> AI-generated 3D visualization. Every 2D character design on this board is drawn by Maryam in Adobe Illustrator.
